SUMMARY

Product Manager and Acting Product Owner in digital health and virtual care, leading strategy and delivery for new and pre-launch AI-enabled healthcare products at Optum New Product Development. Experienced translating regulatory, privacy, and technical constraints into scalable product behavior and user experiences across PHI-regulated environments.

EXPERIENCE

Optum (UnitedHealth Group) — Product Manager / Acting Product Owner TDP Fulltime

Eden Prairie, MN | Aug 2025 – Present

- Lead product strategy, roadmap, and architecture-aligned requirements for a new consumer caregiver monitoring platform in design, build, and pilot preparation phases within regulated healthcare environments.
- Serve as the end-to-end Product Owner, owning backlog prioritization, user stories, acceptance criteria, and release planning across core pre-launch product surfaces.
- Defined product behavior and experience boundaries across PHI, privacy, and AI safety constraints, establishing guardrails for future scalability.
- Led cross-functional discovery and delivery across engineering, design, security, identity, analytics, and clinical stakeholders, driving pilot readiness and senior-leader demos.

UnitedHealth Group — Full Stack Developer & Scrum Master TDP Intern

Eden Prairie, MN | Summer 2024

- Built a cybersecurity workflow tool using Python, Vue, and FastAPI; served as Scrum Master for a cross-functional team.

UnitedHealth Group — Software Developer TDP Intern

Eden Prairie, MN | Summer 2023

- Engineered an encryption pipeline supporting ~5TB of sensitive data in a regulated enterprise environment.

EDUCATION

Furman University — B.S. Biology & Information Technology; Minor: Data Analytics
